

OGH Retrofitting activity

- OGH has recently Installed a new Carrier brand “Screw Type Chiller” (replacing one of its existing Centrifugal Type Chillers)
- Costs more than \$B 80,000.00

According to the projection:

- Comparing power consumption between Screw Type and Centrifugal Type over one year
 - There would be a saving of around 500,000 kWh
 - On assumption of 0.05c/kWh, yearly saving is projected to be about B\$ 25,000.00
