14. **Maintenance of Existing Services**

Careful consideration should be given by the Tenderer to ensure that all necessary work to maintain existing facilities including existing services can be suitably coordinated with his proposed programme of the work and that due and adequate allowance has

been made for these related works in his pricing.

15. **Services**

The Tenderer's attention is drawn to the fact that an extensive and complex network of services mains, pipes and cables exist within or adjacent to the site which will materially affect the Contractor's programme and costs of work required to maintain servicing facilities without interruption during the course of the work. The Tenderer shall make due allowance in his prices for these services. The Contractor shall be fully responsible for all expenses related to repair of or fines due to any damages of any services in the vicinity of the site.

16. **Site Visit**

Tenderers shall visit the site to familiarize themselves with all factors which will materially affect their Tenders. Due allowance shall be made in the Tenders for all such factors.

17. **Interpretation of Documents**

Any doubts or clarifications regarding the documents shall be clarified with the S.O. in writing.

18. **Addenda**

Prior to the date of closing Tenders, the S.O. may issue Addenda to clarify or modify the Tender Documents. A copy of each Addenda will be issued to every Tenderer and shall become part of the Tender Document. Receipt of each Addenda must be acknowledged on the form issued with the Addenda.

19. **Language**

All manufacturer's specification, certificates, container markings and other relevant information referred to in this specification shall be in English.

20. **Validity of Tender**

All tenders submitted shall be deemed to remain valid for one (01) year from the date of closing tender and no tenderer may withdraw his tender within that period.

21. **Transportation (Vehicle Requirements)**

Any vehicle used to transport healthcare waste should fulfill several design criteria:

- The transport vehicle should have an enclosed leak-proof body (box truck) and the vehicle body should be of a suitable size commensurate with the design of the vehicle
- There should be a suitable system for securing the load during transport;

- Vehicles should be kept locked at all times, except when loading and unloading, and kept properly maintained;
- The vehicle should be marked with the name and address of the waste carrier.
